ℹ Born: 19/08/1991
in Richterswil (CH)
Nationality: D
Residence permit: C (EU/EFTA)

I have academic experience in problem solving, data science, scientific software development, and collaborating with international and local research teams. I am a physicist and computational scientist by training who is highly adaptable and passionate about a broad spectrum of scientific fields, in particular computer science, general relativity/cosmology, and quantum physics. I am eager to apply my skills to new industrial challenges in order to contribute to the advancement of technologies in aid of society.

🎓 Education

2016 - 2020	Doctor of natural sciences (PhD), in Theoretical Physics, University of Zürich (UZH), Switzerland Focus: Theoretical Astrophysics & Cosmology Thesis: <i>Exploring models of lensing galaxies: On bridging the gap between observations, models, and simulations</i> ↴
2015 - 2016	Master of Science, in Computational Science, University of Zürich (UZH), Switzerland Focus: Computational Science Minor: Theoretical Astrophysics Thesis: <i>Radiation hydrodynamics of star formation: Infrared feedback in molecular clouds</i> ↴
2010 - 2014	Bachelor of Science, in Physics, University of Zürich (UZH), Switzerland Focus: General physics Minor: Informatics Thesis: <i>Molecular dynamics simulations of bubble nucleation</i>
2004 - 2010	Matura graduation 2010, Kantonsschule Freudenberg (KFR), Switzerland Focus: Languages (Latin and English) Minor: Applied Mathematics and Chemistry Thesis: <i>The chemistry of Alzheimer's disease</i>

⚙️ Practical Experience

today Aug 2016	PhD program in Theoretical Physics at the Institute of Computational Science UZH, Switzerland ➢ I developed the scientific software <code>gleam</code> , an analytics module which includes a highly optimized (cosmic) ray-tracing algorithm in Python, Cython and C wrappers. ➢ I developed the Python-based graphical user interface <code>ModelZapper</code> packaged as a linux and macOS app, for deployment in future citizen science projects. ➢ I developed a javascript framework <code>lensing.js</code> implemented in the <code>streaming-lens</code> and <code>zurich-lens</code> web apps for demonstration purposes at public outreach events. ➢ I have encountered various inverse problems from astrophysical and cosmological observations which required creative and novel approaches for solutions. ➢ I have analyzed large data sets from NASA/ESA satellites and telescopes in order to test cosmological models with strong gravitational lenses. ➢ I have generated, processed, and analyzed large data sets of hydrodynamical simulations on supercomputers to test star-formation and galaxy-formation theories. ➢ I have acquired excellent presentation, lecturing, and communication skills during my time as a teaching assistant at the University of Zurich.
-------------------	--

💻 Skills

OPERATING SYSTEMS	🐧 Linux (arch, debian, red hat, and derivatives) 🍏 macOS 🖥 Windows
PROGRAMMING	🐍 Python, 🎵 Java, 💾 Shell scripting, C, Cuda, Fortran, Elisp, 💻 Javascript, 💬 HTML, 💡 CSS
FRAMEWORKS	OpenMP, MPI, pandas, Tensorflow, Keras, PySpark, PyTorch, Flask, Tkinter, MySQL, jQuery, OpenCV, tesseract-ocr
TEXT PROCESSING	TEX, Org-mode, MS Office/LibreOffice
DEVELOPMENT TOOLS	git, GNU Emacs, Visual Studio Code, Eclipse
COMPUTING & DATA ANALYSIS	Ray-tracing, Markov-chain Monte-Carlo modelling, signal extraction/filtering, machine learning, supercomputer-generated data reduction pipelining and automation, interactive data visualization and animation, computer simulations, N-body/hydrodynamical simulations, bayesian uncertainty quantification, multivariate regression modelling, principal component analysis

Languages

- German (native)
- English (fluent, professional proficiency)
- Latin (ancient, written form)
- basics in French, Russian

Strengths

- passionate about (computer) science
- motivated
- adaptable
- autonomous

Projects

During my free time, I occasionally like to explore new ideas for self-advancement or just for fun. Here are a few notable projects from my GitHub repositories:

FABULAR <https://pypi.org/project/fabular>

ONGOING

A command-line chat program for encrypted communication.

[Python](#) [cryptography](#) [pyngrok](#) [pytest](#) [coverage](#) [bandit](#)

OLLAM <https://github.com/phdenzel/ollam>

2018

A fun, natural language processing program which implements a long short-term memory neural network. When trained on William Shakespeare's sonnets, it is able to generate 'artificial' poems.

[Python](#) [Keras](#) [Tensorflow](#) [HDF5](#)

PENTAPLEX <https://github.com/phdenzel/pentaplex>

2017

A prototype of a receipt scanner/reader which uses OCR and machine-learning, image-processing routines to digitize paper receipts.

[Python](#) [bash](#) [tesseract-ocr](#) [OpenCV](#) [ImageMagick](#)

Research Publications

- ◆ Denzel, P., Palmer, X. G., Çatmabacak, O., Coles, J. P., Corner, C., Ferreras, I., Feldmann, R., Küeng, R., Leier, D., Saha, P., & Verma, A. (2021). The lens SW05 J143454.4+522850: A fossil group at redshift 0.6?, submitted to Monthly Notices of the Royal Astronomical Society.  <https://arxiv.org/abs/2104.03324>
- ◆ Denzel, P., Mukherjee, S., & Saha, P. (2021). A new strategy for matching observed and simulated lensing galaxies, submitted to Monthly Notices of the Royal Astronomical Society.  <https://arxiv.org/abs/2102.10114>
- ◆ Ding, X., Treu, T., Birrer, S., Chen, G. C. ..-F., Coles, J., Denzel, P., Galan, M. F. A., Marshall, P. J., Millon, M., More, A., Shajib, A. J., Sluse, D., Tak, H., Xu, D., Auger, M. W., Bonvin, V., Chand, H., Courbin, F., Despali, G., ... Williams, L. L. R. (2021). Conferences & Workshops

31 Jul, 2020

invited talk, SCIENCE CAFÉ: THE HUBBLE CONSTANT FROM 8 TIME-DELAY LENSES, at UCL workshop, MACHINE LEARNING FOR HIGH ENERGY PHYSICS, at UZH, 

4–5 Feb, 2019

talk & workshop, 49TH SAAS-FEE LECTURES, by the Swiss Society for Astrophysics & Astronomy, 

27 Jan–2 Feb, 2019

invited public outreach talk, 100 WAYS OF THINKING, exhibition at Kunsthalle Zürich, 

23 Sep, 2018

talk & workshop, THE UNIVERSE AS A TELESCOPE, conference at University of Milan, 

3–7 Sep, 2018

talk, EWASS - EUROPEAN WEEK OF ASTRONOMY & SPACE SCIENCE 2018, conference in Liverpool, 

3–6 April, 2018

talk, Swiss Cosmology Days 2018, conference at CERN, 

5–6 Feb, 2018

talk, winner of Science Slam competition, CSZ GRADUATE SCHOOL WORKSHOP, in Gwatt (BE), 

22–24 Aug, 2017

invited public outreach talk, SCIENCE TRAIL: ON THE HUNT FOR DARK MATTER, at Urania Sternwarte, 

18 Apr, 2017

invited public outreach talk, SCIENCE TRAIL: ON THE HUNT FOR DARK MATTER, at Urania Sternwarte, 

21–25 Nov, 2016

project with Nvidia, ACADEMIA INDUSTRY MODELING WEEK, by the CSZ, 

Teaching Experience

Fall, 2019

Scientific Computing I (lecture, UZH)

TA, (inverted-classroom style) lecturer, and Python instructor

Spring, 2019

Scientific Computing II (lecture, UZH)

TA, (inverted-classroom style) lecturer, and Python instructor

Fall, 2018

Scientific Computing I (lecture, UZH)

TA, (inverted-classroom style) lecturer, and Python instructor

Spring, 2018

Informatics in Physics (lecture, UZH)

TA, (inverted-classroom style) lecturer, and Python instructor

Fall, 2017

Introduction to Astrophysics (lecture, UZH)

TA and (inverted-classroom style) lecturer

Spring, 2017

Computer Simulations I (lecture, UZH)

TA, lecturer, and Java instructor

Fall, 2016

Computer Simulations II (lecture, UZH)

TA and Java instructor

Spring, 2016

Computational physics (lecture, UZH)

TA and Python instructor

Spring, 2014

Physics II (lab work, UZH)

TA and supervisor of electrocardiography experiments

Fall, 2013

Physics I (lab work, UZH)

TA and supervisor of Röntgen machine experiments
